

IoT Data Processing agent Deployment

- [Configuration Note](#)
- [Docker](#)
 - [Run Agent with existing broker](#)
 - [Dependencies](#)
 - [Run Agent without an existing broker](#)
 - [Dependencies](#)
- [Native Java](#)

Configuration Note

For more configuration settings please see: [IoT agents configuration](#)

Docker

Run Agent with existing broker

Dependencies

- Docker
- MQTT Broker

Terminal

```
docker run -e connection_broker_mqtt_hostname=<my-mqtt-hostname/IP> -p 8319:8319 linksmart/la:latest
```

Run Agent without an existing broker

Dependencies

- Docker

Terminal

```
docker run --detach --name mqtt-broker -p 1883:1883 eclipse-mosquitto  
docker run -e connection_broker_mqtt_hostname=mqtt-broker -p 8319:8319 linksmart/la:latest
```

Native Java

See [Getting Started Native Java](#)
