LinkSmart Docs

LinkSmart® is an open source platform for developing IoT applications in various domains, such as smart cities, Industry 4.0, and smart grids. The platform provides building blocks as generic and domain-specific services to efficiently implement applications in the Internet of Things. These include projects such as device abstraction, data storage, live data management, and advanced ones such as stream mining and online machine learning.

List of Projects

<table>
<thead>
<tr>
<th>Project</th>
<th>Status</th>
