

# LinkSmart Docs

LinkSmart® is an open source platform for developing IoT applications in various domains, such as smart cities, Industry 4.0, and smart grids. The platform provides building blocks as generic and domain-specific services to efficiently implement applications in the Internet of Things. These include projects for device abstraction, data storage, service discovery, live data management, and online machine learning.

## Projects

<a href="#">LinkSmart® Border Gateway</a>
<a href="#">LinkSmart® Device Gateway</a> 
<a href="#">LinkSmart® Historical Datastore</a> 
<a href="#">LinkSmart® IoT Learning Agent</a> 
<a href="#">LinkSmart® Optimization Framework</a>
<a href="#">LinkSmart® Service Catalog</a> 
<a href="#">LinkSmart® Thing Directory</a> 
<a href="#">Grafana SensorThings Plugin</a>
